

Why is a high IP rating important for outdoor power supplies?

Hence, it is evident that a high IP rating, Ingress Protection, is vital, especially for outdoor power supplies. Furthermore, the proper IP ratings function as a safeguard, preventing costly downtime, and IPD offers a wide range of options. The IP Code, short for Ingress Protection Code, comprises of two digits (e.g., IP20, IP54, IP67, etc.).

Do industrial power supplies have an IP20 rating?

Industrial power supplies housed within cabinets typically bear an IP20 rating, whereas those positioned outside protective environments necessitate higher ratings, such as IP54 or IP67. Learn about IP codes and their significance in selecting power supplies, ensuring protection against foreign objects and moisture ingress.

What is an IP rating on a power supply or LED driver?

Some MEAN WELL power supplies and LED drivers have an Ingress Protection (IP) rating stated in their data sheet. If there is none mentioned then assume that the power supply is only suited to use in a clean indoor environment. The IP rating number indicates what level of ingress protection the power supply or LED driver has been tested to.

What is the IP rating of a field power supply?

As the numerical values climb, so does the level of protection. At IPD, we adhere to industry standards and offer field power supplies with IP ratings as high as IP67 from the PULS FIEPOS series. Electronic devices are assessed in relation to foreign object intrusion or water resistance.

What are the most common IP ratings for outdoor equipment enclosures?

The following are the most common IP ratings for outdoor equipment enclosures. Equipment that has been designed hardened for outdoor use will perform well in an enclosure rated to IP54. It will give a good level of protection from airborne dust and splashing rain. IP54 allows some ingress of water, subjectively defined as ?limited?.

What does the IP rating number mean?

The IP rating number indicates what level of ingress protection the power supply or LED driver has been tested to. The IP rating number consists of 2 digits. The first is the solids (dust) ingress rating, the second is the liquid ingress protection rating. The below chart shows the definitions of each of the numbers used to make up the IP rating.
